Timber Industry Asset Sale – Unique Opportunity

A rare opportunity exists to acquire a fully operational timber processing asset package in the Bay of Plenty region. This is an off-market sale offering significant potential for established operators in the timber, forestry, or processing sectors.

The assets include a thermal-modification kiln system, associated plant, and infrastructure suitable for businesses seeking to expand product range, throughput, diversify operations, or strengthen supply chain resilience to offset imports.

Ideal for industry participants looking for a strategic bolt-on, regional expansion, or long-term investment in New Zealand's growing timber sector.

Key Features:

- High-quality kiln system (European-designed) with proven performance
- Located in a strong timber-processing hub but the kit is relocatable.
- Asset-only sale – no goodwill attached
- Opportunity to expand capacity or repurpose for specialist timber products
- Available for immediate acquisition

Summary:

This is a rare chance to acquire valuable timber processing infrastructure at a fraction of replacement cost. Suited to sawmills, processors, exporters, or investors with a vision for growth.

Owners are open to offers, expressions of interest invited.
